WIRELESS SENSORS TECHNOLOGY

PLUS TWP-2AI WIRELESS TRANSMITTER

PLUS TWP-2AI Wireless Transmitter System is a solution to easily gather the data needed to identify production issues and implement measures to increase efficiency and prevent future disruptions.

PLUS TWP-2AI Wireless Transmitter was designed to monitor 4..20 mA / 0..10V signals, providing a secure communication, without cable requirements of a complex wired solution.

Conductivity, vibration, humidity, flow, level, pressure and temperature are some examples of industrial process variables, possible to be monitored and controlled.

[1] Range depends on the RF propagation environment and Line of Sight (LoS). Always verify your wireless network's range by performing a Site Survey
[2] Dependent on radio channel selection
[3] Configurable
[4] In some countries, the frequency band admitted is not so extended as the default range.
[5] The radio frequencies admitted in Australia are available from channel 26 to channel 50.
[6] It is recommended to use a power supply with short-circuit current protection or equipped with a fuse.
